

HALO

Reshape your space

Sleek.
Minimal.
Bold.

Hunter Stoves transform ordinary moments into extraordinary experiences. The Halo range of wood burning stoves offers an unmatched combination of efficiency, innovation, and craftsmanship to enhance your home.

Engineered by the finest combustion specialists in the industry, each stove in the Halo range boasts extraordinary efficiency and exceptionally low emissions. This isn't just about heating spaces; it's about redefining how we experience warmth and comfort.

Every stove is meticulously made and assembled by hand in our Cornwall factory, where our skilled specialists pour their expertise and passion into each detail. Using only the highest quality materials and the latest in cutting-edge technology, the Halo range stands as a testament to modern design and engineering excellence.

With its sleek, minimalist aesthetic, the Halo range is not just a stove; it's a statement of sophistication and innovation.

Experience a sleek, bold design that reshapes your living space.

Sophistication. Innovation.

10
YEAR
WARRANTY

Any appliance bought through the showroom of an authorised Hunter Stoves Group dealership will automatically be covered by our standard 2 year conditional guarantee.

This standard 2 year warranty can be extended to a 10 year conditional warranty for our wood-burning stoves and 5 years for our boiler stoves. For full warranty specifications and terms and a list of authorised stockists, please visit hunterstoves.co.uk.

The Radial.

Elegant, efficient,
and environmentally
friendly, the Radial
transforms your space
with warmth and
minimalist style.

The Radial is a testament to minimalist design and maximum efficiency. This impressive cylindrical stove features a large curved glass window that provides a captivating view of the flickering flames within, making it not just a heating element, but a piece of art.

Achieving an impressive 84% efficiency on wood, the Radial is our most efficient stove yet. It's equipped with a low-emission catalyst and an advanced airflow system that ensures a clean and powerful burn. A simple, single air control allows for quick adjustments from vibrant flames to gentle, slow burning, enhancing your experience with every use.

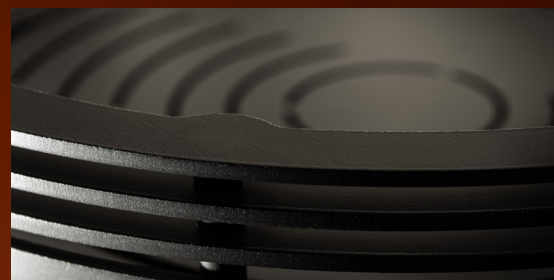

Technical Information

Catalyst:	YES
Grate & Ashpan:	YES
Nominal Heat Output to Room:	4.9 kW
Heat Output Range:	3kW to 7kW
Energy Efficiency Rating:	A+
Efficiency on Wood:	84%
CO Emissions, at 13% O2:	0.059%
Flue Outlet:	125mm (5")
Weight:	122kg
Fuel:	Wood
Eco Design 2022 Approved:	YES
DEFRA Smoke Control Exempt:	YES
Cleanburn Technology:	YES
Airwash for Glass:	YES
Glass Size:	578mm
Direct Air Kit Option:	YES
Distance to Combustible Materials (mm) Rear:	50mm
Distance to Combustible Materials (mm) Side:	500mm
Distance to Combustible Materials (mm) Corner Installation:	150mm
Distance to Combustible Materials (mm) Front:	950mm

Airwash

This cutting-edge system enhances stove functionality by drawing air from the upper section, heating it within a dedicated chamber, and then directing it downwards behind the glass door. This creates a

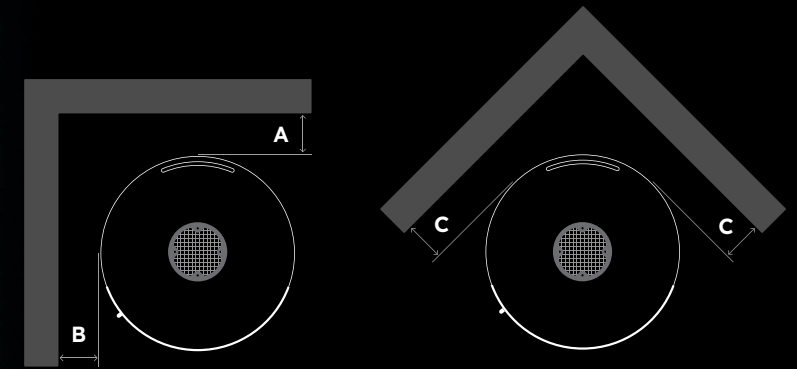

protective barrier between the fire and the glass. As a result, smoke and combustion particles are prevented from coming into contact with the glass surface, ensuring it remains pristine and transparent.

Grate & Ashpan

Equipped with a grate and ash pan, the Halo stove offers hassle-free maintenance and is perfect for those looking for a simple way to remove ash from their stove. These built-in features enhance combustion efficiency and ease of use.

Combustible material clearances

Model	A (to Twin-Walled Flue)	B Combustible	C Combustible	Front to furniture
HALO Radial	50mm	500mm	150mm	950mm

Non-Combustible material clearances

Clearances to Non-Combustible surfaces can be as close as 50mm.

However, for optimum performance and heat output, we recommend a clearance of 150mm.

Dimensions

All measurements in mm

DEFRA Approved

If you reside in certain areas of the UK, you may be familiar with the restrictions imposed by the Clean Air Act, particularly for those in designated Smoke Control Areas. Violating this act could result in a fine up to £1000.

However, our stoves offer an exception to this rule. They have been designed to produce minimal smoke and have therefore received an exemption from DEFRA's Clean Air Regulations. This permits you to burn wood in our approved stoves, even if your home is within a Smoke Control Area or Smokeless Zone.

The technology within our stoves maintains consistently low emissions, complying fully with the guidelines set by the Department for the Environment, Food & Rural Affairs. If your residence is located in a Smoke Control Area, you will find our stoves not only meet regulatory standards but in fact exceed them meaning you can enjoy the comfort of a wood-burning fire without compromising on environmental responsibility.

Sustainable warmth: Our commitment

Choosing a stove from Hunter Stoves Group means more than just adding a reliable and cosy heat source to your home; it signifies a commitment to a sustainable future. We've formed a meaningful partnership with Ecologi, an organisation focused on real climate action. Each month, we contribute to both tree planting initiatives and other climate positive projects, aligning with Ecologi's ambitious goal to halve global CO2 emissions by 2040. As you enjoy the comforting warmth of our Halo Radial stove, you can also take comfort in knowing that your choice supports broader environmental stewardship. You can track these contributions and their impact through our dedicated page on Ecologi's website ecologi.com/hunterstovesgroup.

Ecologi

Eco design technology

Our stoves' dependable performance has been enhanced to ensure our products meet the demands of the modern world. Now featuring Eco Design technology, the Halo stove continues to offer the warmth and comfort you've come to love, whilst surpassing the latest environmental standards.

Credentials
